

CROPSTAR SERVICES

Crop Scouting

This provides an intensive summer long program. Scouts monitor your crops on a weekly basis. Experienced CropStar Consultants will then provide timely, economic, and environmentally sound recommendations based on these reports.

We also offer tissue sampling, soybean cyst nematode sampling, rust testing and nitrate and stalk testing.

Soil Sampling

CropStar uses Geo Referenced Soil Sampling results to make accurate crop nutrient recommendations.

*1 magazine booklet per field

*PDF booklet online

*Data married for import into GPS Software

*Fertilizer Recommendations

*Client Consultation

MISCELLANEOUS SERVICES

Micronutrient Tests

SB Cyst Nematode Tests

Late Spring Nitrates

Stalk Test

Geo-referenced Field Boundary

Geo-referenced Tile Lines

Equipment/Technical Support

VR Planting Prescriptions

VR Technology/Record Keeping

Pre-Harvest Combine Check Program

Includes:

- Complete combine kit maintenance.
- Field setup
- Data analysis
- Complete calibration
- Data exported at season end for maps

Combine Calibration

Planter inspections

full and comprehensive inspection of the entire planter including

- meter tested on our Meter Max test stand
- full tong to closing wheel inspection
- measurements on wear parts like openers frogs marker disks
- full written report of our findings with a quote for parts and labor to repair
